FROM: David Paul Brown *DPB*
RE: Trauma Patient Review and Helicopter Response Areas
DATE: June 18, 2015

The EMS Advisory Council met on June 3rd, 2015 and was provided a report on the trauma patient and helicopter response areas. The report was the culmination of an extensive review of the current trauma patient transportation and destination policy programs within the EMS System in Montgomery County.

The EMS Advisory Council was asked to consider eight recommendations to improve the trauma patient transportation and destination programs. After extensive discussion and consideration of all views, the EMS Advisory Council voted to approve all eight recommendations.

Recommendation number three was to revise the primary response air medical areas to include the licensed agency JeffStat based from Hatfield Township. The attached map shows the new first due air response areas that are effective as of this date as they have been programmed into the county computer aided dispatch (CAD) system.

A summary of the change includes JeffStat being the primary air medical agency for the following municipalities; Franconia Twp., Hatfield Borough, Hatfield Twp., Horsham Twp., Lansdale Borough, Lower Salford Twp., Montgomery Twp., North Wales Borough, Salford Twp., Souderton Borough, Telford Borough, Towamencin Twp., Upper Gwynedd Twp..
